

# TUNGSTEN CARBIDE GRANULATED COATING FOR PARTS THAT WEAR

## Now available at Catford Engineering

Using a process that has been in use for excess of 40 years, we can dramatically increase the life of your points, augers, wear plates and most other areas where abrasion causes wear.

The process deposits a layer of weld impregnated with tungsten carbide granules on the wear prone area.

### For use in

- Mining
- Agriculture
- Quarry crushing
- Roadworks

### Applications

- Points & Shears
- Post hole digger teeth
- Augers
- Wear plates
- Rollers
- Blades

And many other areas where abrasion causes wear
